

How To Get The Most From Your Kangen Water™ Sample

Here's All You Have To Do...

1. Drink Kangen Water™

- STOP drinking sodas, sports drinks, flavored waters and bottled waters.
- Be sure to drink enough water every day. The recommended daily amount of water you should drink is ½ your body weight in ounces. For Example: if you weigh 200 pounds, you should drink at least 100 ounces per day, which is actually less than two 64oz Big Gulps from 7-11!!

2. Storing Kangen Water™

- To maintain the beneficial properties of Kangen Water™, store in a dark place, like your refrigerator or pantry.
- Drink Kangen Water™ from a glass or reusable plastic bottle, be sure NOT to drink the water directly from the jug, this can contaminate the water.

3. Use Kangen Water™ to make your water based beverages.

- Use the Kangen Water™ when making your favorite water based beverages, like coffee, tea or juices from frozen concentrate.
- Helpful Hint: Reduce the amount of coffee grounds when brewing coffee. The micro-clustering property of the Kangen Water™ will draw out more of the rich flavor from the coffee, giving you a great tasting cup while using less grounds!

4. What to expect from the Kangen Water™.

- Kangen Water™ will hydrate you better, which can lead to an increase in energy, improved digestion and even a better nights sleep.
- Kangen Water™ can help flush built up toxins and impurities from the body. This process will vary from person to person, but normally lasts no longer than 1 or 2 days.

5. Call us when you need more Kangen Water™.

- If you are out of Kangen Water™ or if it has been longer than 3 days since your last refill, call to get a new batch.
- Helpful Hint: Keeping the water fresh is the best way to get the most benefit from your Kangen Water™ samples.
